

Watering Guidelines for New Trees

Schedule	15 Gallon Tree
First Two Weeks After Planting	5 gallons every other day
Spring Daytime temperatures between 60 and 75	5 gallons every 5-7 days
Summer & Drought Daytime temperatures above 75	5 gallons every 3 days
Fall Daytime temperatures between 60 and 75	5 gallons every 5-7 days
Winter Daytime temperatures below 60; tree is bare	5 gallons every other week
<i>Repeat Above for the first 2 years</i>	<i>Repeat Above for the first 2 years</i>
Continue As Needed Recommended during summer droughts	5 gallons every week or every other week

***A heavy rain OR a steady rain lasting for 4+ hours restarts the watering timetable.**

**Keep the
root ball
moist.**

Test the soil with your finger.
Dry → apply more
Moist → apply again soon
Wet → apply less

**Trees need a SLOW,
deep root watering
applied directly to
the root ball.**
